1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,6,8-9,11,12,14,15,19,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Matthews (6,386,730).

- a lens having an optical axis; a first light source positioned on the optical axis; a second light source spaced apart from the first light source away from the optical axis; and the lens having a light-transmissive portion between the first and second light sources(fig 2); the lens includes a transmission path for the second

light source parallel to the optical axis; the transmission path is a passage defined in the lens.
